Diesel & Heavy Equipment Technology

For Adult Students Only

Gordon Cooper Technology Center offers full-time career pathways to adults. A student is eligible to receive college credit for most full-time career majors. The Adult program hours are 7:55 AM to 2:35 PM with a 30 minute lunch, Monday through Friday. Some Saturday classes are held and those dates will be announced by the instructor. All students must be assessed before entering a career major. This is a year-round program. See the class calendar for exact dates.

The Diesel & Heavy Equipment Technology program prepares students for a career in the medium and heavy-duty truck repair industry with or without prior mechanical experience. The program may be completed in 12 months as an adult student attending full-time. The training includes both classroom study and training on current equipment with laboratory testing facilities. A student internship is also available to some students who meet certain standards. All students have the opportunity to participate in on-the-job training at the discretion of the instructor, after meeting certain standards.

The course has been evaluated by the National Automotive Technicians Education Foundation (NATEF) and meets the industry standards as a medium and heavy-duty truck program. This program has therefore been certified by the National Institute for Automotive Service Excellence (ASE) in the following areas: diesel engines, drive train, suspension and steering, brakes, electrical/electronic, heating and air conditioning and preventative maintenance and inspection.

Career Majors:
(For financial aid a Career Major must be 600 hours or more.)

*Out-of-District Tuition is double the amount of In-District Tuition

Entrance Requirements: Reading and math skills at the 9th grade level or above and assessment testing. Also, basic typing and computer literacy skills with desire to learn about medium and heavy-duty trucks. Basic hand tools, a valid driver’s license and the ability to pass a drug test for job placement.

Any questions direct them to the instructor via phone or e-mail below.

*College Credit: College credit towards an Associate of Applied Science can be earned from St. Gregory’s University.

Certification Testing: The content in this program aligns to industry credentials. Credentials targeted include Oklahoma State Department of CareerTech Competency in Preventive Maintenance, Diesel Electronics, and Diesel Engines. Within the adult program a class B CDL course is included as certification tests as a separate night class for students that do not have a CDL. See the instructor for class dates. It is optional. ASE air conditioning certification is also available to students for an additional fee. Students may elect to take the ASE Certification test for an additional fee.
